Manuscript using the SAFI dataset

Eduard Klapwijk¹, Nami Sunami¹, Joanna
Mania¹, Bora Lushaj¹, Anna Volkova¹

¹Erasmus University Rotterdam, Rotterdam,
Netherlands

This is a mock manuscript, produced to give an example of a complete archival package. One part of that package is the published (or accepted) manuscript or publication.

1. Introduction

This mock file is intended to serve as an example of a manuscript that should be part of the archival package. This manuscript should include a brief description of the problem definition, research design, data collection (sampling, selection and representativeness of informants) and methods used. An electronic version of the published manuscript will generally suffice. In this case we provide a mock manuscript in the form of an article that looks like an article published in the [Royal Society Open Science](#) journal. It was created using RMarkdown and a journal template from the `rticles` package.

Place `\EndFirstPage` at the point where the plain text on the first page stops. Warning: excess text will be hidden behind the copyright box. The example below contains line 1 to 19 in the code. Lines 14 to 17 are hidden behind the copyright box.

2. Methods and materials

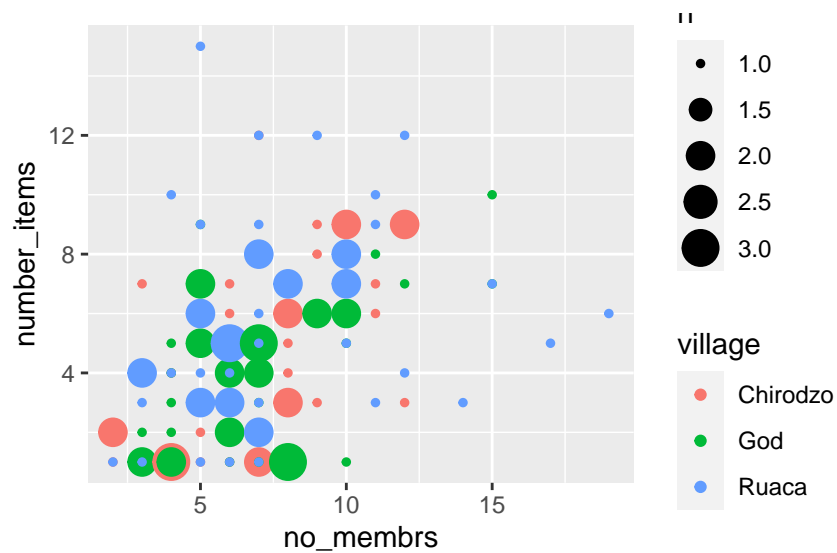

For this mock project we use (a cleaned version of) the SAFI dataset [1]. The preprocessing is based on the Data Carpentry for Social Sciences and Humanities materials ([R for Social Scientists](#)).

Table 1. This is the aforementioned table.

| Village | Member Association | Mean Number of Members |
|----------|--------------------|------------------------|
| Chirodzo | no | 8.062500 |
| Chirodzo | yes | 7.818182 |
| God | no | 7.133333 |
| God | yes | 8.000000 |
| Ruaca | no | 7.178571 |
| Ruaca | yes | 9.500000 |

3. Results

See Table 1 and the plots below.

Data Accessibility. The data that support the findings of this study are openly available in Figshare at <https://doi.org/10.6084/m9.figshare.6262019.v4>.

Authors' Contributions. All authors contributed equally.

Competing Interests. The authors declare that they have no known competing financial interests or personal relationships that could have appeared to influence the work reported in this paper.

Acknowledgements. The authors would like to thank the authors of the Data Carpentry for Social Sciences and Humanities materials ([R for Social Scientists](#)) and the SAFI dataset for sharing data and materials.
